

CCO

# CCO

- From the CCO menu, users can query SMUs and Service Packs information on various IOS-XR platforms and releases.
- If a SMU has already been downloaded to the CSM Server internal repository, a green check icon is displayed on the Status column.
- Download a SMU by checking the checkbox and selecting Action – Download Selected Files. Then, select the server repository that will store the downloaded image.
- To exclude certain platforms and releases from displaying under the CCO menu, go to Tools – User Preferences to indicate that.

Filter superseded SMUs/SPs
