Non-Admin Tools

Tools Menu

- **List Hosts**
    - Displays all managed hosts with their connection information. To make changes, click the host name of interest.

- **Edit User**
    - Modifies the current user authentication and other information.
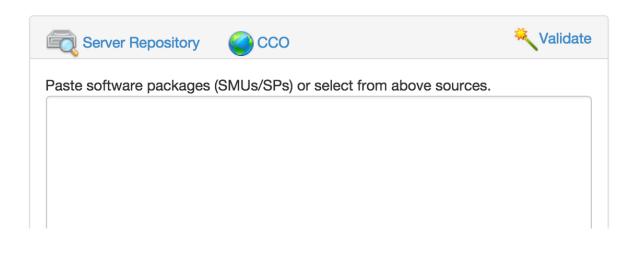

- **Validate Software**
    - Validates the provided software packages by determining if there is any missing pre-requisites.

- **User Preferences**
    - Excludes certain platforms from displaying on the CCO menu.
    - Defines Cisco authentication. The authentication is needed for software download.

Validate Software

Validate Software

- Provide a software package list (SMUs or SPs) using the following methods
  - Entering them manually
  - Selecting from a server repository
  - Selecting from CCO

- The SMU or SP names provided can be in different formats so long as the platform and release are identifiable.

- Click the validate icon to validate the list.

- If there is any missing pre-requisites or superseded packages, a information dialog will be displayed.

User Preferences

User Preferences

- Excludes certain platforms and releases from displaying on the CCO menu.

- Defines the CCO authentication information.
